December 20, 2007

Dear Mike,

Thank you and your team for the diligent efforts put forth in our development, The Village Townhomes at Walnut Cove. I truly believe that the smart house technology Comtec designed and installed in our Model home has contributed and greatly enhanced our sales. Your state of the art products have thoroughly impressed our clientele, many of which are implementing the same displayed features in their new townhome. Comtec's precision and attention to detail is an asset to our product. We appreciate the top quality service that you have given us and we look forward to continuing our relationship.

Sincerely,

Wallace Cheves
Managing Partner
